

2023 VEHI Health Plan Materials

New 2023 ID Cards & Outlines of Coverage Coming Soon

Blue Cross and Blue Shield of Vermont will be mailing out two important documents:

1. All members will receive a **new ID card**, with an effective date of January 1, 2023. The new ID cards may have updated, cost-sharing information. ID numbers and group numbers, however, are not changing, unless an employee made a plan change during open enrollment this year. Members can expect to receive their new ID cards over the next 10-12 business days.
2. **Outlines of Coverage** will come in a separate mailing and will be mailed once Benefit Description Documents (BDDs) are approved by the Vermont Department of Financial Regulation (DFR).

Question: Can I still use my 2022 ID card on or after January 1, 2023, if necessary?

Answer: Yes, your 2022 ID card is still valid and can be used until your new 2023 ID card is received. When you receive your new ID card, dispose of the old one properly to protect your member information, and remember to keep your new ID card in a safe and secure place. (ID cards are **date stamped** on the back, so you can easily identify the latest version.)

Mail-Order Prescriptions: Co-Payment Modification for Platinum and Gold [Non-CDHP] Plans

Due to a Vermont mandate, VEHI members in the Platinum and Gold [**non-CDHP**] Plans will now be charged the same number of copayments for prescriptions via mail-order as for the same prescriptions purchased at retail pharmacies.

This means starting January 1, 2023, those who utilize a mail-order pharmacy for a 90-day supply of their medication will be subject to **3 copayments**, rather than the **previous 2 copayments** for a 90-day supply. This change affects less than 60 of VEHI's approximately 34,500 members. If you are affected, you will be contacted directly by Vermont Blue Rx.
