

As your partner in providing healthcare to your employees, we aim to make this as easy as possible for you. This includes keeping you informed about the latest regulations and requirements so you can focus on what matters - supporting your employees.

The Gag Clause Prohibition Attestation

Required by the Consolidated Appropriations Act (CAA), insurance companies and group health plans are prohibited from entering into any agreement that would restrict the insurance company or group health plan from:

- Providing provider-specific cost or quality of care information or data
- Electronically accessing de-identified claims and encounter data for each participant, beneficiary, or enrollee
- Sharing such information, consistent with applicable privacy regulations

What This Means For You

Blue Cross VT is in compliance with the Gag Clause Prohibition and will be making an attestation to the Centers for Medicare and Medicaid Services (CMS) on our behalf, and behalf of our insured groups. **There is no action required by your organization.**
